

SPRING MAINTENANCE

Spring is the perfect time to tackle some maintenance and repair projects that will prepare your house for warm weather. By doing so, you'll make your home more comfortable and save on summer energy bills.

INSIDE

- Replace your HVAC filters
- Seal attic air leaks
- Seal exterior doors and windows
- Check for basement water leaks

OUTSIDE

- Clear your gutters
- Trim trees & bushes
- Inspect your roof
- Get an A/C tune-up

BE PREPARED FOR

SPRING'S FICKLE FOUL WEATHER

Are you prepared when docile rain showers turn into threatening storms?

BEFORE THE STORM:

Make sure your cell phone is charged. Consider purchasing an external battery charger for your phone to charge it without electricity.

Have a battery-operated radio available so you can stay updated on the latest weather watches and warnings.

Unplug appliances and other electrical items, such as computers. Damage can occur from power surges caused by nearby lightning strikes.

Have an emergency kit ready and create a family communication plan.
