

# Holiday Time of Use Tips

Reducing your energy usage during On-Peak hours throughout winter can significantly lower your statement. Here are some time of use tips tailored to the season to help you save.

## 🌡️ Turn Down the Thermostat

When hosting, lower your thermostat by a couple of degrees. Each degree reduces energy usage. The room will naturally warm from body heat, keeping guests comfortable without overheating.

## 🕒 Timers for Holiday Lighting

Using timers for decorative lighting. Choose from three types: **Mechanical Timers:** Simple, set with pins or pegs. **Digital Timers:** More flexible, with specific timing options. **Smart Timers:** App-controlled, with voice control and custom schedules.

## 🍪 Bake Dishes Together

Bake items together at the same temperature. Avoid opening the oven door frequently, which causes heat loss and increases energy use. Skip preheating when possible to save even more. On the stove, use the correct burner size.

**ON-PEAK TIMES: MON-FRI, 5-8 PM**  
*\*EXCLUDING HOLIDAYS*

# IMPORTANT NOTICE

**Hendricks Power Cooperative Statements Go Paperless**  
Effective January 1, 2025, members with an email address on file will receive statements exclusively by email.

**Digital**

Currently, many members receive both a printed and electronic statement. Hendricks Power Cooperative will be reducing printed statements due to increasing postage rates, printing costs, and environmental efforts.

**Paperless**

**What does this mean for me?**

If you have an email address on file, you will only receive an electronic statement moving forward.

Questions? Call (317) 745-5473.
