

Sign Up for Real-Time Outage Notifications

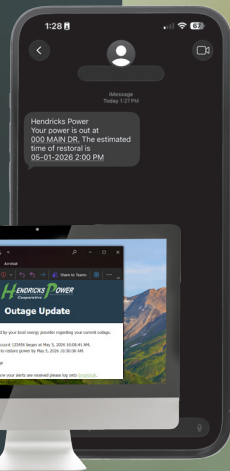

Stay Informed During Power Outages With SmartHub Notifications

Sign up to receive real-time outage alerts by text, email, or both. Before enrolling, make sure your SmartHub contact information is current and that you've opted in to receive notifications.

To enroll, log in to SmartHub and go to **More > Settings > Manage Notifications > Service**, then select which alerts you want.

- Planned Power Outages
- Outage Updates
- Power Outages
- Power Restoration

Click each notification option and turn on the toggle to enroll. **Need assistance? Contact Hendricks Power at (317) 745-5473.**

Contact Indiana 811 Before Digging

Before Digging

Contact Indiana 811 at indiana811.org or by dialing 811 at least two full working days before excavation begins, excluding weekends and holidays, to have public underground utility lines marked.

Landscaping

Keep pad-mounted transformers and other utility equipment clear and accessible for utility crews. Shrubs, fencing, mulch, and decorative landscaping should not block access to electrical equipment.

Look Above

Ladders, long-handled tools, tree limbs, and other materials can come dangerously close to overhead power lines. Trees and landscaping should never be planted too close to overhead power lines or utility poles.
