2026 RESIDENTIAL RATES

Hendricks Power, along with its board of directors, approved a rate increase that will be reflected in May statements. This update will better align the true cost of providing reliable, affordable power with the cost of wholesale power, prices for materials and equipment, investments in technology and reliability, and the ongoing maintenance required to operate and maintain the electric system.

**On Peak 5:00 pm – 8:00 pm, excluding weekends and New Year’s Day, Memorial Day, 4th of July, Labor Day, Thanksgiving Day, and Christmas Day. Off-Peak rates will apply from 5:00 pm – 8:00 pm on weekends and these holidays.*
