

BURNING QUESTIONS ABOUT SOLAR ENERGY?

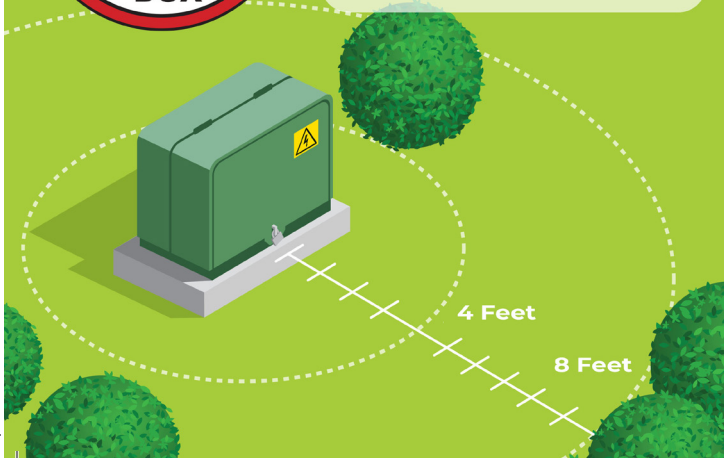

Is it right for you? Take a closer look with the help of your Energy Advisor at Hendricks Power. It's free—and we'll make sure those good intentions aren't burning a hole in your pocket.

Find what's right for you. Contact us today at (317) 745-5473.

Keep the area surrounding the pad-mount transformer clear so that workers can maintain the equipment as needed. Shrubs and structures must be a least **8 Feet** away from the transformer door and **4 Feet** away from the sides.

WORKING ON SPRING YARD WORK?

Be sure you're cleaning up around your transformer! These big green boxes in your yard provide electricity to your neighborhood. To provide reliable service and maintain equipment, Hendricks Power needs to access the inside of your transformer. When trees, bushes, fences, or large rocks block your transformer, it extends outage times for everyone.

Don't forget, before you dig near a transformer, submit a request with 811 by giving them a call or visiting them online at www.Indiana811.org.
