

**Hendricks Power is committed to proper maintenance of trees and vegetation to help provide safe and reliable electricity for you - our members. We've been in your area and want you to know:**

- Please review the enclosed letter.
- A tree trimming crew contracted by Hendricks Power will soon be performing power line vegetation management in your area.
- Trees in the right-of-way on your property need to be pruned or removed to prevent an electrical outage or hazardous situation. Hendricks Power will perform this work at no cost to you.
- The trees you reported were inspected. No immediate danger is present, so we will perform this work during our regularly scheduled vegetation management at no cost to you.
- The work you requested is not necessary. The trees do not cause safety or reliability concerns for Hendricks Power.
- Tree(s) marked with paint or ribbon should be removed. If the tree(s) fall and come in contact with the power line, it could create a safety issue and/or your electric service could be interrupted.
- Hendricks Power has found vegetation that needs to be controlled by herbicide. We will have a contractor apply approved herbicides in the near future.
- Hendricks Power will send a contractor soon to mow right-of-way corridors in your area.
