ONE LEAN, GREEN, WATER HEATIN' MACHINE

HOT WATER FOR LESS MONEY

When you switch to an ENERGY STAR® certified heat pump water heater, you'll save up to 50% on your water heating energy costs. That's because a heat pump water heater operates more efficiently than gas alternatives. It has a smaller carbon footprint, too, to the tune of about half the carbon emissions of a propane or natural gas water heater.

Best of all? Hendricks Power Cooperative will help you switch by giving you cash rebates on installation. That's some sweet savings on one mean machine.
