smart hub

TM

With SmartHub, the power of data is in your hands through convenient account management and detailed usage information. SmartHub, a mobile and Web app, delivers accurate, timely account information and allows you to make payments in a secure environment with the touch of a button from your mobile device or PC.

Daily usage • Bill pay • Outage history • Reminders & Notifications

This innovative software replaces our current e-Bill system. Members already enrolled in e-Bill will login to SmartHub using the same credentials. If you receive a paper bill, you can still take advantage of the SmartHub features and continue paying bills the same as you have in the past. We encourage everyone to use this resource, whether it's for one feature, or all of them!

Login using the SmartHub link at www.hendrickspower.com or download the free app today.
