*Learn more about Smart Strips on back!*

## Q: What exactly is a “Smart” Strip and how is it different from a normal power strip?

A: A Smart Strip can tell which plugs are in use to help save energy; they will shut down power to electronics that go into standby mode. This helps reduce use by energy vampires. Plus, the one that we'll be providing through energy audits has multiple different uses and settings that our Energy Advisors will help program for maximum efficiency!

Start increasing your efficiency today with a **FREE** energy audit and Smart Strip!
